Reply to Office Actions of December 6, 2005 & February 28, 2006

PATENT  
Docket: CU-3243

**Amendments To The Specification**

Replace paragraph [0046] of the specification text with the following new paragraph:

[0046] The dust receptacle 31 is easily emptied, because the dust receptacle 31 is easily removable from the cyclone body 10. As described above, the dust receptacle 31 is separated from the cyclone body 10 ~~by unhooking~~ by unhooking the hooking protrusion 35 from the connecting slit 45 and pulling the dust receptacle 31 in a downward direction. As the dust receptacle 31 is pulled downwardly, the operating bar 75 received in the connecting portion 71 of the filter 51 also moves downwardly together with the dust receptacle 31. Accordingly, the driven protrusion 73 is rotated by the inclined motion of the operating groove 77 of the operating bar 75, and the filter 51 is rotated.
